CAUTION: PLUG INTO GROUND FAULT PROTECTED RECEPTACLE ONLY.

Suitable for Indoor/Outdoor Use – Store indoors while not in use.

Some Typical Timer Operations:

1. 10.00 PM - Turn on at 6:30 AM the next day.
2. 1:00 PM - Turn on at 7:30 PM the next day.
3. 8:00 AM - Turn on at 8:30 AM the next day.

Example: If now is 6:10 PM Wednesday, and you want it on at 7:30 PM Thursday, please follow below steps to set the timer:

a. Press the "PROG" button until the "MO" is blinking on the display.

b. Press the "PROG" button to enter the hour setting, shown as figure 2.

Once complete the programs settings, press "OFF" button, press "OFF" button for 3 seconds, go back to normal current time display while if you want to continue the settings, you have 15 seconds waited when you finished your current setting, the timer will save your setting and display on the top of the screen, shown as figure 2;

b. Press the "PROG" button to enter the hour setting, shown as figure 5.

The reaction time is 15 seconds for every setting. It means that once longer than 15 seconds the timer reaches the "on" time. Make sure that you have chosen the right AM/PM setting on the timer as well.
